

## Chiho Attended 2017 CMRA Annual Convention And Hosted Dinner Party

The 17th International Secondary Nonferrous Metals Conference and Exhibition, also known as 2017 CMRA Annual Convention, was successfully held at Shangri-La Hotel in Ningbo, China from 7 to 9 November 2017. Chiho Environmental Group Limited ( "CEG" or the "Group" ; Stock Code: 976.HK) participated in the event, and hosted a dinner party gathering its suppliers and customers together to discuss on the future development of the Group.

CMRA Annual Convention is a platform established in 2000 by China Nonferrous Metals Industry Association (CMRA) and undertaken by its Recycling Metal Branch. The convention gathers elite of the industry from home and abroad

to discuss hot topics and difficulties in the development of the nonferrous metals recycling industry. It promotes coordinated development of the industrial chain, and strives to create the most effective annual event for the global metals recycling industry. This year, with the subject of "Change and Breakthrough", the convention aims to discuss the change and breakthrough of the metals recycling industry and seek new growth areas under the policy reform of solid waste importation as well as new environmental protection policies.

On 7 November, Chiho Environmental Group hosted a special dinner party at Shangri-La Hotel in Ningbo, inviting its suppliers and customers to discuss the Group's business and future development. Mr. Qin Yongming, Chairman, Executive Director, and Chief Executive Officer of the Group, Mr. Peter Wong, Executive Director, and Chief Financial Officer, Mr. Mike Greulich, Chief Trading Officer, along with other management members attended the dinner.

*Mr. Qin Yongming, Chairman, Executive Director, and Chief Executive Officer of the Group, is making a speech at the dinner.*

At the dinner, Mr. Qin Yongming introduced the management team, development strategy and future business model of the Group. He said, Chiho Environmental Group will seek to become a leader in metal recycling and environmental protection in the future by continuously capitalizing on the Group's strength, excavating client resources, and promoting synergies among all units.
